STANDARD OPERATIONAL GUIDE

# DOLU LOGISTICS V1.2

This is the standard day-to-day guide for using the Dolu Logistics v1.2 platform. For a deeper technical and system-wide breakdown, please refer to the **Master System Overview** document.

## 1. Customer Workflow

SERVICE EXPERIENCE

- **Step 1: Request Pickup:** Enter Pickup and Drop-off locations. The system instantly draws the route and calculates the price based on PH Zones.
- **Step 2: Booking Details:** Provide the names and phone numbers for both the Sender and the Receiver. Ensure addresses are accurate for the rider.
- **Step 3: Payment & Confirmation:** Follow the on-screen payment instructions. Once completed, a unique **Tracking ID** is generated.
- **Step 4: Tracking:** Use the Tracking ID to monitor the parcel's progress on the interactive map and see real-time status updates.

## 2. Admin Workflow

OPERATIONS

- **Confirming Orders:** Once a customer pays, the **Bell Notification** will ring. Review the order and tap "Confirm."
- **Dispatching:** Go to the Dispatch Desk, select an available rider, and set the status to **"In Progress."**
- **Reporting:** Use the "Export to Excel" tool in the Bookings tab for your daily revenue audit.

## 3. Rider Workflow

FIELD OPERATIONS

- **Accepting Jobs:** Check your dashboard for the **NEW LOAD** badge. Tapping a job shows you the full pickup/dropoff route.
- **Contacting:** Use the one-tap WhatsApp or Call buttons to coordinate with the sender or receiver.
- **Confirming Delivery:** Use the **"Slide to Deliver"** handle at the destination to safely close the job.

## 4. Standard Operational Workflow

*Example Logistics Cycle: Urban to Regional Delivery*

1. **Initial Booking:** A customer creates a request from **Old GRA** to **Airport Road**. High-Zone pricing is applied automatically.
2. **Confirmation:** The Admin uses the Notification Center to confirm the booking status upon verification of payment.
3. **Assignment:** The Dispatcher assigns a rider via the Dispatch Desk. The status is moved to **In Progress**.
4. **Transit Phase:** The assigned rider receives an automated notification. They utilize the integrated contact tools to notify the sender and receiver.
5. **Confirmation of Handover:** Upon arrival, the rider utilizes the **Tactile Swipe Handle** to confirm physical delivery and handover.
6. **Completion:** The system automatically records the revenue and updates the public tracking status to **Delivered**.
